AI-enabled cough
monitoring with
timely insights &
alerts

Medication Management

Inhaler LYF:
One-tap inhaler &
symptom tracking
to optimize inhaler
therapy

Preventive Care

Heal LYF:
Science-backed
natural remedies,
AI-Assisted regimen
management

Why Respire LYF?

- **Holistic Support:** For every stage of respiratory disorders including **COPD, Asthma and Cough**.
- **Comprehensive Toolset:** Monitor symptoms, manage inhaler therapies, and **optimize preventive care**.
- **AI-Powered Insights:** For personalized healthcare plans and smart scheduling.

Respire LYF apps are part of LYF Suite, a super app for AI-powered holistic health care!

Respire LYF (W-Series)

Breathing Freedom in Your Hand,

Take Control of Your **Asthma, COPD, and Chronic Cough** with The World's First **AI-Powered** Smartwatch-Based Respiratory Health Companion for Monitoring, Managing and Mastering Your Respiratory Health.

Inhaler LYF (W-Series)

Zero-Touch Inhaler Tracking & Management

- **World's First Intelligent Self-logging Inhaler Diary:** Do you know up to 70% people forget to use inhaler on time. Hands-free Logging, no manual entry required, smart reminders on your wrist for missed doses.
- **Patent Pending** technology that intelligently & seamlessly tracks & logs inhaler use with smartwatch i.e., instead of buying an expensive smart inhaler, let your smartwatch do all the job, only more smartly!
- **Real-Time Corrective Feedback:** Do you know up to 90% inhaler users fail to use inhaler correctly! First watch-based solution that detects and corrects common inhaler mistakes even when using a low cost non-smart inhaler or a common smart inhaler!

✔ Monitors Shaking Time

Ensures proper medication mixing

✔ Tracks Inhalation Duration

Helps achieve optimal dosage

✔ Detects Body Posture & Inhaler Angle

Gives corrective feedback to improve medication delivery

Cough LYF (W-Series)

Privacy-aware Cough Monitoring

✓ AI-Powered Cough Detection

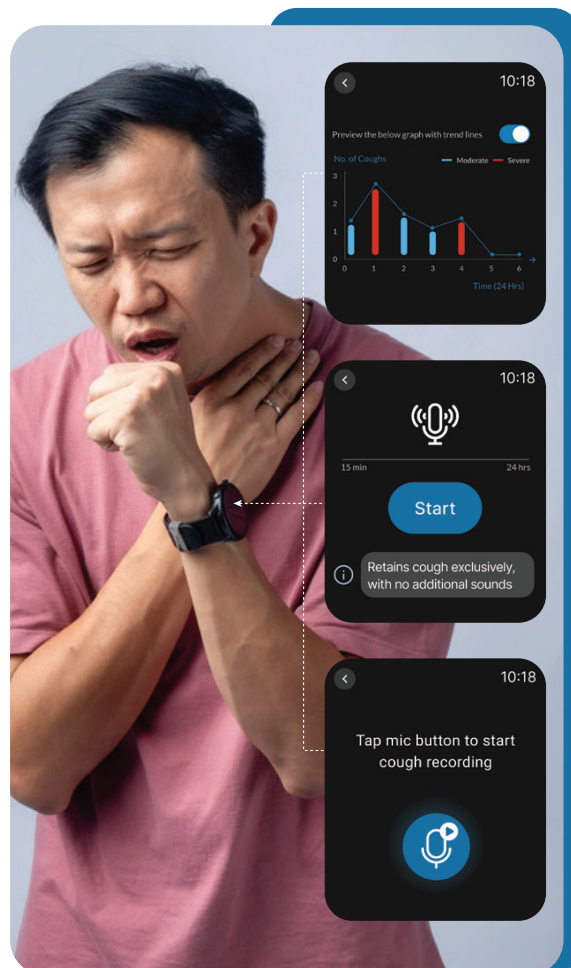

Uses a patent pending AI technology to seamlessly monitor your cough via smartwatch

✓ Cough Summary Reports

Get insights directly on your smartwatch

✓ Privacy-First Technology

AI only detects coughs, ignoring other sounds

Did You Know?

Symptom Monitoring

Tracking cough frequency can predict exacerbations up to 3.4 days in advance—helping you avoid triggers & improve quality of life.

Inhaler Management

Over **400 million** people use inhalers worldwide, & Up to 70% of patients forget doses, & 90% make common errors—undermining treatment success.

Holistic Prevention

Evidence-backed natural remedies can substantially boost well-being for those with asthma, COPD, and chronic cough.

Respiratory diseases such as asthma & COPD affect over **600 million** people worldwide & remain the third leading cause of death globally. In the U.S., one person is dying every four minutes due to episodic and reactive care. Let's change this situation by achieving holistic respiratory health through continuous and preventive care using **Cough LYF, Inhaler LYF, & Heal LYF.**

About AI4LYF: Why We Exist

Every year, millions lose their lives—and billions more suffer chronic illness—due to delayed diagnoses and a lack of effective preventive care. Today's **"sick care"** model is episodic, expensive, and inaccessible to many, rather than the continuous, affordable healthcare everyone deserves.

AI4LYF was founded to change this. As a global syndicate, **we're transforming reactive "sick care" into proactive, holistic health management by harnessing AI, wireless connectivity, and biosensing innovations.** Our mission is to empower billions worldwide with personalized, easily accessible solutions that help prevent disease through holistic health management, foster lasting wellness, and improve quality of life—even in the face of chronic conditions.

If you believe this is a mission worth pursuing, we want to hear from you.

Who can benefit from partnering with us:

- ✓ **Anyone who prefers preventive and holistic health care, instead of sick care!**
- ✓ **Forward Looking Telcos:**
 - Significant additional revenue streams from existing users
 - First mover advantage with the World's first AI-powered Holistic Health Management Platform
 - Remote Health Monitoring & Wellness as a Service (RHWaaS)
 - Highly scalable digital wellness ecosystem
 - Seamless Wearables & IoT Integration
 - Data Monetization & Insights to drive business growth
 - Pre-install LYF Suite for built-in AI health features
 - Reduce churn through increased user engagement & personalized services
- ✓ **Insurance Companies & Healthcare Providers:**
 - Lower costs & claims with preventive care, reducing hospital visits
 - Improve adherence with smart tracking and feedback
 - Personalize wellness programs tailored with AI-driven insights
 - Lower risks with better chronic disease management like asthma, COPD, diabetes, & more
- ✓ **Public Health Bodies & Government Agencies:**
 - Early disease detection and interventions enabled by AI-driven symptom tracking
 - Population Health Insights with aggregated, anonymized data for policy planning
 - Health awareness & education to support large-scale preventive care initiatives
 - Telehealth & remote monitoring to expand access in underserved areas
